

Internship title: IT Intern

Organization: SolarSPELL (Solar Powered Educational Learning Library)

Location: Tempe; remote

Type of internship: Non-paid

Application deadline: rolling until filled

Start date: August 18th

Description:

SolarSPELL is seeking 1-2 interns to assist the IT specialist in a diversity of tasks, including library export, server troubleshooting, debugging, and more. This role is an ideal opportunity for a student looking to gain a breadth of experience handling dynamic tasks.

SolarSPELL is an offline, digital library initiative at Arizona State University that provides localized educational information and the training to build 21st-century skills in offline environments that may lack electricity, internet connectivity, and/or traditional libraries. We work with in-field partners, like the Peace Corps and the UN Refugee Agency, to build local capacities and ensure long-term, sustainable impact.

Users connect to the SolarSPELL offline, digital library over WiFi, using any WiFi-enabled device (smartphones, tablets, laptops) to freely, and safely, surf thousands of resources that are carefully curated and continually improved to meet local information needs.

More information on SolarSPELL can be found here: <http://solarspell.org>

This internship offers an exciting opportunity to contribute to improving the quality of educational information available to students and teachers around the world, whose schools may lack Internet connectivity, electricity, and/or traditional libraries. Your contributions will be brought to the field and used by teachers and students, within months of your internship!

Interns will be expected to attend a new intern orientation upon starting the internship. Ideal candidates will be detail-oriented and self-starters.

Essential Duties:

- Utilize the Digital Library Management System (DLMS) to export SolarSPELL digital libraries as needed
- Host SolarSPELL digital libraries on development and production servers including raspberry pi mini computers
- Publish and apply regular updates to the digital library management system running on the Linux offline server
- Maintain the DLMS backup system

Minimal Qualifications:

- Academic focus in Information Technology, Computer Engineering, Computer Science, or a related field.
- Strong proficiency in linux scripting languages
- Knowledge in managing Linux systems and administering Apache and Nginx servers
- Understanding of the web development cycle and programming techniques and tools
- Proficiency in HTML, CSS, JavaScript and Bootstrap. Proficiency in Angular is a plus.
- Effective verbal and written communication skills.
- Thrive in a team environment and work well with others.

How to apply: If you are interested in applying for this position, please submit a resume and cover letter to Courtney Finkbeiner at courtney.finkbeiner@asu.edu. All documents should be in PDF format and follow the naming style of [LastName_FirstName_DesiredPosition]
